

Dr. Alicia Cooperman (Ph.D., Columbia University) is an Assistant Professor of Political Science and International Affairs at The George Washington University. Her research focuses on environmental politics and policymaking, civil society, and local politics and accountability. Her broader research agenda studies the politics of natural disasters, natural resource management, and climate change mitigation and adaptation. Recent projects examine the role of community organizing in improving household water security and adaptation to climate change in a variety of contexts, including Northeast Brazil, *colonias* in El Paso County, and along the Texas Gulf Coast. Dr. Cooperman holds a Ph.D. and M.Phil. in Political Science from Columbia University, a Master of International Affairs from UC San Diego's School of Global Policy & Strategy, and a B.A. in Human Biology from Stanford University.
