

The Department of Philosophy proudly presents the second annual

GRIFFITH LECTURE

(formerly known as the Goutman Lecture)

Featuring

Dr. Dale Jamieson

New York University

The Ethical Challenges of Climate Change

The climate change that is currently underway presents us with many challenges but only recently have the ethical dimensions of these challenges begun to come into view. Climate change will result in vast amounts of harm yet most of us do not feel responsible for the harms to which we contribute. Dr. Jamieson explains this alienation and sketches the change of outlook that will be required to address it.

Dale Jamieson is Professor of Environmental Studies and Philosophy, Affiliated Professor of Law, Affiliated Professor of Bioethics, and Director of the Animal Studies Initiative at New York University. He is the author of *Reason in a Dark Time: Why the Struggle to Stop Climate Change Failed--And What It Means For Our Future* (Oxford, 2014). "Love in the Anthropocene," a collection of short stories and essays co-authored with Bonnie Nadzam, will be published by O/R Press later this year.
