I3P Institute for Information Infrastructure Protection

April 2018

WELCOME TO *THE I3P MONTHLY!*

The Institute for Information Infrastructure Protection (I3P) is a consortium of 26 leading universities, national laboratories, and nonprofit institutions dedicated to strengthening the cyber infrastructure of the United States.

The I3P Monthly highlights the impact of I3P experts on research, policy, and practice. For more information on the I3P, see our website - thei3p.org.

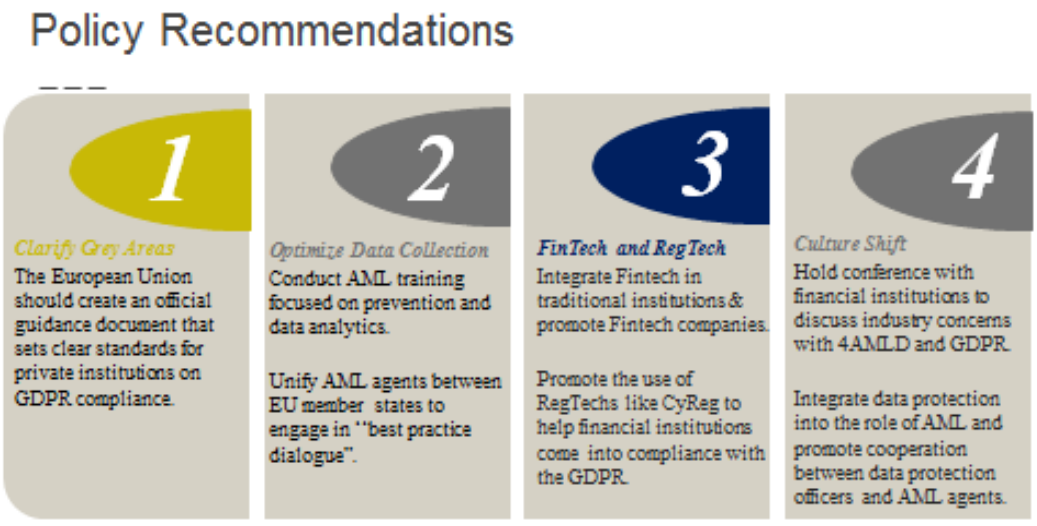
CONSORTIUM NEWS

Congratulations to Purdue CERIAS - 20th Anniversary!

April 3-4, 2018 | CERIAS 2018 | Lafayette, IN

The 19th Annual CERIAS Security Symposium examined emerging research in information assurance, cyber and cyber-physical security, resiliency, privacy, and cybercrime. During the symposium, they also celebrated the 20th Anniversary of **Purdue University CERIAS** discussing what has changed - and what's the same - in the cyber landscape over the last 20 years. More details from the symposium are here.

I3P April 2018 Webinar: Rules and Regulations: Balancing AML Efforts and Data Protection



presented by **Mr. Christopher Allison and Ms. Lizzette Marrero** (The George Washington University). Mr. Allison and Ms. Marrero discussed policy solutions that seek harmony between a citizen's right to privacy, and a country's responsibility to safeguard against illicit activity. Their research will inform broader, transnational discussions that can make AML practices less controversial and more effective. In addition, both acknowledged the team on this project: Davis Narwold, Jonathan

Park and Katerina Peifer. LISTEN HERE for the presentation.

I3P MEMBER HIGHLIGHTS

Diana Burley (The George Washington University) presented as part of a Fireside Chat panel at the 20th anniversary Purdue CERIAS Information Security Symposium. The topic of the discussion was "The State of Cybersecurity Education - Can Our Educational System Produce the Quantity and Quality of Graduates Needed to Meet Labor Demand?"

Additional Highlights include:

- She was quoted in The Week's article "How small businesses can defend against cyberattacks."
- Presented at Cyber Security Education Workshop 2018 in Lake Tahoe. Her topics were the ACM/IEEE/AIS/IFIP Cybersecurity Curriculum (CSEC 2017) and CSEC mapping to the NICE Workforce Framework.

Professor Vincenzo Piuri, a professor of computer engineering at the University of Milan, Italy and a visiting researcher at George Mason University, has been working on a project, "Engineering Researcher from Italy tackles cloud security and biometrics." which includes **Sushil Jajodia**, director of the Center for Secure Information Systems (CSIS), and **Massimiliano (Max) Albanese**, the center's associate director. Professor Piuri is also running for 2019 IEEE President-Elect.

UPCOMING EVENTS

The I3P Webinar Series will return in September 2018 with an engaging line-up of experts. Contact us to learn more or to request webinar topics.

These complimentary 30 minute webinars, held at noon ET on the 3rd Friday of each month, provide a relaxed forum through which I3P experts share state-of-the-art research on topics of importance to securing cyber infrastructure.

More information on the I3P is available here. Contact us at thei3p@gwu.edu to discuss opportunities to engage with I3P subject matter experts.
