## **Early Morning Conversations**

### **Fundamentals/Essentials/Premises**

**(system, observation, change, structure, process, invariance, feedback, closure)**

**Larry Richards, Judy Lombardi**

Description: The intent of these early morning conversations is to provide an informal forum for dialogue on topics related to cybernetics in general and the conference in particular. A theme with some suggested topics for each of the three days has been pre-identified to help stimulate an initial dialogue. However, the conversations can deviate to topics of interest to the participants. Of particular interest to the facilitators is vocabulary used in the conference with fundamental or central implications for concepts in cybernetics.
